KMS is the name of the tools that have been used to activate MS Office and Windows operating system in particular, and it is work on the Key Management Server. This server is introduced by Microsoft owner Bill Gates, which helps larger companies to easily activate Windows. These large companies feel uncomfortable installing a new window. They are disturbed when each Windows is activated separately in each computer. That's why Bill Gates creates a server for the companies where all their machines are connected. If you to try to install a new window on your computer, this server will automatically activate it. These KMS activators do the same to activate your windows and Office. You connect through these servers and make Microsoft realize that your computer is also part of this server. This type of activator activators the only tools that work perfectly, and you will never be locked by Microsoft, although you get all the features of Windows, such as getting the latest updates, virus and threat protection and more. What is KMS? KMS is Key Management Server activators are the types of activators that modify the host files on your computers. These activators help you activate not only Windows OS, but also Microsoft Office. KMS activators connect you to the Microsoft Key Management Server, which activates your Windows immediately. In addition, the license you receive will be renewed every 180 days of the period. If you use them, you will receive all the latest updates from Windows, and you can enjoy all the features without restrictions. These activators are the only solution to enable WinOS or Office permanently. There are also many activators on the Internet that claims that they give you real activation. Everything they give you malware, viruses and Trojans and hurt your machine as well. This is why everyone switches to these types of activators, as they are trusted by many people. They never miss what they promise to do and always give you 100% of what you want. There are many KMS Activator available where we discuss some most used and famous activators. Type of KMS There are different types of KMS available on the Internet, but few of them work perfectly. Each of these activators has its own characteristics and values. We do not compare them because they develop the task for what purpose. Let me also tell you that they should know better. Some of the activators are only made to activate Office products such as Office 2010, 2013, 2016, and 365. The same rule applies to windows activation because they are very different. In this case, there are several types of KMS activators for each version of Windows OS. For example, there is the most famous activator called KMSPico, and it is very well known and popular. As I said, each activator is made to do their own task, just as this activator is only helpful when activating Windows 10 or 8. So, the users of Windows 7 can't use it, and they then need another activator to do their job. Just like that, Windows 7 Loader is also the Windows activator, but it only works on 7, not in 8 or 10 versions. In addition, we discuss each of these activators so that you can find everything you are looking for. I will report on everything necessary that is helpful to you. Also, the method will share each version of Windows and Office activation, making you feel even more comfortable with us @Download Best KMS Activators! you are using the ISO image for Office 2016 and installed on your PC?
